

NEWSLETTER

November 2024

It's been an exciting month at TW! We have successfully developed our very own folding ratchet binder, available in 5/16-3/8, 3/8-1/2, and 1/2-5/8". It is made of G80 alloy steel, making it suitable for both G70 and G80 applications. It is prevalent in transport and tie-down applications. Contact your designated CSR or our sales team at sales@twprod.com for quotes and details.

Although we did not exhibit at the SEMA show this past month, our representative was able to visit the show and connect with some of our clients there. As usual, we were excited to see some of our products used in the vehicles displayed at the convention. We look forward to being back next year!

As we progress into November, our team has been working hard to prepare for the upcoming ATE in Baltimore, MD. This trade show takes place once a year at the Baltimore Convention Center. In addition to exhibiting some of our regular products, we will be showcasing our latest product, a folding binder, so be sure to stop by our booth #2022! Our team, including the senior customer service specialist and the vice president of production, sales, and marketing, will be there to answer any questions you might have.
