What We've Been Up To

Over the past month, we've focused on making key improvements to support our customers more efficiently. One of our biggest accomplishments is perfecting our **warranty tagging system** – making it easier than ever for you to access warranty details.

Here's what's new:

- All qualifying products now include a **QR code** that takes you directly to your **warranty information**.
- Use our **online warranty lookup** tool to search for your warranty – just enter your **PO# and Part#**.
- **Submit claims** easily through our new Warranty Claims page.

Check Out Our Warranty Lookup [Here](#)

Disclaimer

Please note: Standalone parts manufactured by us and bearing our name or logo are still covered under our standard 1-year warranty. The QR code system and warranty lookup tool currently apply only to complete assemblies.

Thank you for your continued support!
