

# March at TW Products

By TW Products on March 30th, 2023

## Our First Quarter!

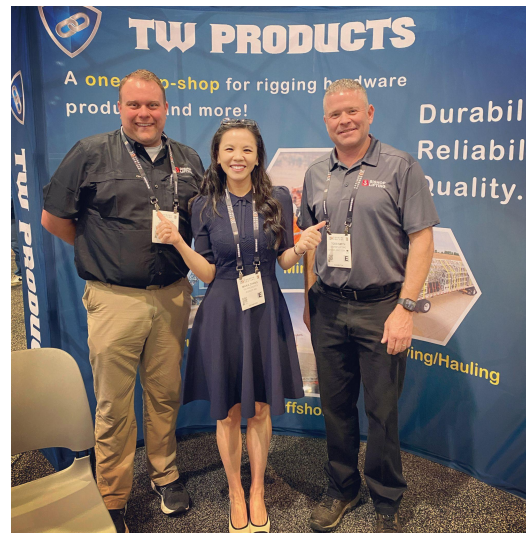

Our first AWRF Slingmakers Ad.

TW's first quarter was exciting, with a new office, POs, two new employees, and a new customer! This is our first year starting with our new line of synthetic products as well. On top of that, we are looking forward to many new marketing channels we have participated in, including an appearance at CONEXPO/AGG Trade Show and features in AWRF's Slingmakers Magazine! All these exciting additions to the company have helped us start our 2023. For any interested marketers, please send your marketing inquiries to [marketing@twprod.com](mailto:marketing@twprod.com). We will appear in each quarterly issue of Slingmakers for 2023, so check us out there!

## ConExpo/AGG 2023

TW Products was delighted to attend this year's CONEXPO/AGG Trade Show in Las Vegas, Nevada. Our staff members attended from March 14th-18th, presenting various products, including our newer synthetic products. In addition, our people spoke to many attendees from various industry suppliers, vendors, and manufacturers and made excellent connections.

It is worth sharing that "one of the major reasons I love my job is because of the people in the industry who are authentic, down to earth, benevolent, and trustworthy." says President Maria Zhang, pictured with two other attendees and our existing customers. Our team thoroughly enjoyed meeting with various industry professionals and leaders.

TW Products prides itself on its quality of manufacturing as well as its quality of service. This includes being available to open dialogue with those interested in what we have to offer, whether through events such as this one or our customer service team at our office here in Jessup, MD. If you are an existing customer with questions or concerns about past, present, or future business opportunities, or if you are seeking equipment for your rigging needs for construction or otherwise, and would like to discuss specifics, do not hesitate to contact our customer service team at [customerservice@twprod.com](mailto:customerservice@twprod.com). Additionally, if you want information about our many products, our website at [www.twprod.com](http://www.twprod.com) includes our most current catalogs.
