

Although this year has been difficult for many businesses and individuals due to the coronavirus pandemic, we are wrapping up our year strong! Not only did we meet our goals in product R&D, but we also exceeded them. Our primary goal is to create at least one new product each quarter; well, we created over seven. To exceed expectations and goals are a strong mindset of our leadership, which in return, has allowed us to not only survive during a global pandemic, but also to obtain a bigger market share overall.

Read highlights for some of our new products developed and/or added to our product offering throughout the year:

### Red & Black Bow Shackle -

The bow shackle is made from ultra-high tensile strength steel with a Working Load Limit of 4-3/4 tons (10,500 lbs.).

It is designed to take loads from multiple directions without developing unsafe side loading!

### Stainless Steel Swivel Eye Hook -

The swivel eye hook features a removable safety latch and is load rated, making it ideal for industrial and marine applications.

Subject to a 1-year warranty!

### G215 Round Pin Shackle -

They are quenched and tempered, with alloy pins. Each shackle is embossed with the Working Load Limit, size, our logo and name, which means they are subject to a 1-year warranty!

### Jaw-Jaw Load Binder -

100% forged alloy steel, including the barrel and hooks. Products are embossed with the Working Load Limit and manufacturer seal 'TW PRODUCTS' for an extended one-year product warranty!

Carabiner keychains inspired by our regular snap hooks. We re-engineered our heavier snap hooks through material modification and made them lightweight yet heavy-duty products for your everyday use!

### Carabiner Keychain -

Carabiner keychains inspired by our regular snap hooks. We re-engineered our heavier snap

### Custom Chain Assemblies -

Being the manufacturer of various forged rigging hardware products including hooks, links, rings, and blocks/pulleys, we can assemble any chain assembly to meet nearly any application!

### Chain Block Assembly -

Our chartreuse swivel shackle snatch block attached to a 30" chain with matching clevis grab hook. Perfect for securing into T slots, keyholes, or rings; providing a fast and secure anchor point. These are specifically designed for changing the direction of winch lines.

TW Products plans to continually exceed our annual quota for the year of 2021 and further. This aligns with one of our core corporate values: improve and innovate continuously. We understand only when we continuously develop and grow can we be a valuable partner to our customers and other key stakeholders.
