TW PRODUCTS

February 2025

January was a busy and productive month at TW Products. We started and completed several key organizational deliverables. First, we created a brand new G100 product catalog. We would like to have the copy produced and ready to be handed to our customers by the end of February or early March.

Second, we have finalized a list of trade shows as a part of our marketing efforts for 2025. We are excited to see new and old faces at these marketing events. Further, we have onboarded new team members to meet our growth needs. We have added additional members to our various departments: marketing, administrative, accounting, and finance.

In February, we hope to make more progress on our projects. These include preparing for our first trade show of the year, the Mid-America Trucking Show. We also plan to improve our online presence by updating our website and social media platforms.

Make sure to read our monthly newsletters or follow us on social media to stay updated with the details.
